

Product Data Sheet

Bera – Gravel Fix

Bera is a rigid retention and stabilization layer that has a filled and compacted strength of 300 T/m². Designed to stop lateral slip in landscaping, this product can also be applied to pitched roofs to prevent down slope substrate movement.

Material	Polypropylene
Dimensions	1.2 x 0.8m
Cells per sheet	530
Depth	32mm
Cell wall thickness	1.4mm
Weight	1.53kg/m ²
Water storage capacity	not yet known
Load Bearing	300 tons/m ² (unfilled)

Bera is designed to provide a strong and stable sub-base for the application of gravel and pebbles on paths, driveways, car parks and roofs.

Benefits:

- Light and easy to install
- Ultrasonic welding to ensure high vertical and lateral strength
