

## Product Data Sheet: Aluminium Edging

Grey2Green's aluminium retention edging, preventing lateral slip and creating clean line divisions.

<b>Material</b>	Aluminim
<b>Dimensions</b>	2 or 3 m lengths
<b>Height</b>	75,100,150,250
<b>Thickness</b>	2mm
<b>Apparent density</b>	2.71g/cm <sup>3</sup>
<b>Tensile Strength</b>	80Mpa

Grey2Green's aluminium retention edging prevents lateral slippage and creates clean line divisions between the different roofing aspects. Our edging does not restrict the flow of water via the drainage perforations placed regularly along its length.

- Provides stable and robust retention edging
- Allows for clear line division of materials
- Does not restrict flow of water
